"A GREAT TOP COAT WILL GIVE AN EXCELLENT FINISH"

- UNIGUARD 760 Metal Clear
- UNIGUARD UV Superior Enamel
- UNIGUARD 451 Silver Gal
- Silver Gal Aerosol

DIY RUST PROTECTION RANGE

CLEAN & TREAT

PREP RIGHT FOR A LONG LASTING SUPERIOR FINISH

WAX & GREASE REMOVER

500 ML - AU03690000.50 | 1 LT - AU036900000001

Concept Wax & Grease Remover is a solvent-based cleaner for removal of contaminants prior to painting. It can be used for cleaning any paint or metal surface.

RUST CONVERTER PRIMER & SEALER AEROSOL

400g - IN0259000.400

Concept Rust Converter Primer & Sealer is a product which chemically reacts with rust and converts it to a primer sealer therefore becoming anti-corrosive. You then can just apply top coat. Used for all metal applications.

WAX & GREASE REMOVER AEROSOL

400g - AU0369000.400

Concept Wax & Grease Remover (Aerosol) is a solvent based cleaner for the removal of surface contaminants prior to painting. It can be used for cleaning any paint or metal surface.

UNIGUARD

RUST PROTECTION

UNIGUARD 106 RUST CONVERTER PRIMER SEALER

500 ML, 1 LT & 5 LT

Code: 500 ML - IN10690000.50 | 1 LT - IN10690000001

5 LT - IN10690000005

Clean, treat, prime and seal your rusted metal surface in one easy step with our **Uniguard 106 Rust Converter Primer Sealer**. Our product is ideal for all metal applications and converts your surface into an anti-corrosive and primed finish, allowing you to directly apply your top coat.

FEATURES & BENEFITS

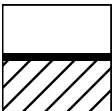

SUPERIOR PERFORMANCE

PRIME

PRIME FOR A DURABLE
FINISH THAT LASTS

COLD GAL ZINC COAT AEROSOL

400 g

Code: IN9206200.400

Concept Cold Gal Zinc Coat (Aerosol) is a cold galvanising primer that dries to a durable crack resistant coating. It resists oxidation and will provide galvanising protection to bare metal even when scratched.

85% zinc

Cold Gal

FEATURES & BENEFITS

EXCELLENT DURABILITY

Protects bare metal even when scratched

SUITABLE FOR WELDING

Reduces smoke & electrode wear when welded

READY TO USE

No set-up required, quick and ready for use

ANTI-CORROSIVE TECHNOLOGY

Galvinised surface prevents rust from forming

FAST DRYING

Fast dry formula allows you to get the job done quicker

UNIGUARD

RUST PROTECTION

UNIGUARD 118 COLD GAL

1 LT, 4 LT

Code: 1 LT - IN11880000001 | 4 LT - IN11880000004

Uniguard 118 Cold Gal is a heavy duty yet easy to apply fast drying zinc rich primer that can be applied to all ferrous metals. Uniguard 118 Cold Gal is an ideal long lasting anti-rust barrier suitable for all highly corrosive areas.

Cold Gal

FEATURES & BENEFITS

EASY APPLICATION

Product can be easily applied with a brush, spray gun or roller

HIGH BUILD AND GOOD OPACITY

High build formula with good opacity

FAST DRYING

Fast dry formula allows you to get the job done quicker

ANTI-CORROSIVE TECHNOLOGY

Prevents rust in a galvanised form

UNIGUARD 102 BRUSHABLE ETCH PRIMER - GREY

500 ML, 1 LT, 4 LT

500 ML - IN10260200.50
Code: 1 LT - IN10260200001 | 4 LT - IN10260200004

Uniguard 102 Brushable Etch Primer - Grey is a chromate free ready for use etch primer which can be applied using a brush or roller over a wide range of metal surfaces. It has excellent adhesion and when used with Uniguard UV Superior Enamel top coats provides strong protection against rust and corrosion.

Grey

FEATURES & BENEFITS
